Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner for Patents, Office of Initial Patent Examination, Customer Service Center, P. O. Box 1450, Alexandria VA 22313-1450 on April 1, 2004

REQUEST FOR CORRECTION OF FILING RECEIPT

Commissioner for Patents
Office of Initial Patent Examination
Customer Service Center
P. O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Applicants hereby request a corrected filing receipt. Attached is a copy of the Filing Receipt with the changes noted thereon and a copy of the first page of the specification showing the Cross-Reference To Related Application. Specifically, there is an error on the original Filing Receipt. Please make the following correction:

Please insert --which claims priority to 10/324,661 12/20/2002 ABN-- as shown on the attached filing receipt copy.

Applicants submit that the error was not the fault of the Applicants. Accordingly, no fee is believed to be due. However, the Director is hereby authorized to charge any additional fees which may be required, or credit any overpayment, to Deposit Account Number 16-2480.

Respectfully submitted,

By

CROSS-REFERENCE TO RELATED APPLICATION

5 This application claims priority to copending U.S. application No. 10/610,299, filed June 30, 2003, Case Number 9313, and to U.S. application No. 10/435,996, filed May 12, 2003, Case Number 9134R, both of which claim priority to prior copending U.S. application No. 10/324,661, filed December 20, 2002, Case Number 9134.

10

FIELD OF INVENTION

This invention relates to webs such as films and fibrous woven and nonwoven webs. In particular, this invention relates to laminates of such webs treated by mechanical formation to have improved fluid handling properties for use in disposable absorbent articles.

15

BACKGROUND OF THE INVENTION

Disposable absorbent articles such as disposable diapers, incontinence products, catamenial products and the like are widely used, and much effort has been made to improve the effectiveness and functionality of these articles. In general such articles have a fluid permeable body-facing layer, often referred to as a topsheet, a fluid impermeable garment-facing layer, often referred to as a backsheet, and a fluid storage member, often referred to as an absorbent core, sandwiched between the topsheet and the backsheet. Other components, such as acquisition layers, secondary topsheets, and adhesive fasteners are also well known in the art.

25

30

It is known to make laminates of web materials to combine the fluid handling properties of each into an improved fluid handling composite material. For example, it is known to combine into a laminate two nonwoven materials by needlepunching to produce integrally-bonded and entangled nonwoven webs. This process is often simply referred to as "needling." U.S. Patent No. 5,080,951 granted Jan. 14, 1992 to Guthrie, for example, discloses a nonwoven web composed of multiple layers bonded by a needling process that causes some fibers to extend through the entire thickness of the fabric and beyond the surface, thereby leaving short segments of filaments protruding from the exterior surface of the web. Frequently hydroentangling is used to accomplish a similar entangling of two fibrous nonwoven webs. Needling, like fluid
